

HLTH 101

Health and Wellness

3 Credits

Community College of Baltimore County Common Course Outline

Description

HLTH 101 – Health and Wellness: explores essential wellness practices as they relate to current concepts of preventative medicine. This course investigates the latest scientific findings germane to the major diseases and causes of premature death in the United States. Issues addressed include those pertaining to social, emotional, physical, intellectual, spiritual, and environmental health. The importance of self-responsibility within a wellness lifestyle is stressed, enabling the student to take the initiative to enhance his or her quality of life.

Pre-requisites: ACLT 052 or ACLT 053 or (ESOL 052 and ESOL 054)

Overall Course Objectives

Upon completion of this course, students will be able to:

1. develop and implement a plan appropriate for promoting personal wellness;
2. evaluate the credibility of health information from sources such as magazines, websites, books, journals, and the internet;
3. demonstrate effective oral, written, and critical thinking skills as they relate to health behaviors contributing to a wellness lifestyle;
4. differentiate between a holistic/preventative medicine and a treatment model;
5. apply technology to assess and enhance the promotion of positive health behaviors;
6. interpret technical and medical language as it relates to health and wellness;
7. practice effective interpersonal communication skills;
8. assess personal behavior and establish goals to promote individual wellness;
9. determine how personal decisions influence community and environmental health;
10. compare and contrast a variety of cultural and ethnic backgrounds to identify differences that may contribute to risk factors for developing chronic disease; and
11. demonstrate knowledge of current wellness information and issues.

Major Topics
