

**ALHL 101**  
**Allied Health Leadership I**  
6 Credits

Community College of Baltimore County  
Common Course Outline

**Description**

**ALHL 101 – Allied Health Leadership I:** Acknowledges articulated industry credit for prior learning by national certification in an accepted allied health care program. The course provides academic credit for achievement of fundamental allied health competencies in a structured field of study that is subject to overall direction or guidance and that adheres to relevant principles, practices, and domains of study.

**Pre-requisites:** Successful completion of a national certification in one of the accepted allied health care fields is required. Enrollment in this program requires permission of the Allied Health Leadership program director.

**Overall Course Objectives**

Upon completion of this course, students will be able to:

1. demonstrate basic cognitive and practical skills required to carry out tasks within a field of study or work;
2. demonstrate ability to recognize and act on elementary relationships between assignments and tasks;
3. recognize correlations between functions and tasks based on stipulated scope of practice criteria and interpret results;
4. assume responsibility for learning and for the outcomes of structured activities in familiar contexts;
5. exercise autonomy subject to overall direction and guidance;
6. demonstrate basic interpersonal and communication skills required to learn and exchange knowledge with others; and
7. display behavior consistent with the ethical and legal standards within a field of study.

**Major Topics**

Topics relate to knowledge of theory, practical skills, and ethical and professional behavior within specific allied health scopes of practice. These topics maintain standard language and cross over domains and competencies obtained from certification guideline resources.

- I. Scope of practice for field of study
- II. Regulatory and legal oversight for field of study
- III. Ethical issues and code of ethics for a field of study
- IV. Cultural competency
- V. Administrative processes and procedures across a specific field of study

The Common Course Outline (CCO) determines the essential nature of each course.  
For more information, see your professor's syllabus.

- VI. Therapeutic practices across a specific field of study
- VII. Health care team

### **Course Requirements**

This course requires successful completion of a current national certification in one of the accepted allied health fields.

### **Other Course Information**

This course is a placeholder to award a predetermined number of credits by articulated industry for prior learning assessment. Students must complete at least 25% of the Allied Health Management program of study in residency by taking CCBC coursework.
