

**ALHL 201**  
**Allied Health Leadership III**  
6 Credits

Community College of Baltimore County  
Common Course Outline

**Description**

**ALHL 201 – Allied Health Leadership III:** Acknowledges articulated industry credit for prior learning by national certification in an accepted allied health care field. The course provides academic credit for achievement of allied health competencies in a structured field of study that may be subject to overall direction or guidance and that adheres to relevant principles, practices, and domains of study.

**Pre-requisites:** Successful completion of a national certification in one of the accepted allied health care fields is required; ALHL 102. Enrollment in this program requires permission of the Allied Health Leadership program director.

**Overall Course Objectives**

Upon completion of this course, students will be able to:

1. demonstrate cognitive, practical, and clinical skills required to carry out tasks within a field of study or work;
2. demonstrate specialized technical skills in a designated health care field;
3. demonstrate ability to recognize and act on relationships between assignments and tasks and to explain these relationships to others;
4. recognize correlations between functions and tasks based on stipulated scope of practice criteria and assess results;
5. assume responsibility for learning and for the outcomes of structured activities in familiar and novel contexts;
6. exercise autonomy in a field of study subject to overall supervision;
7. demonstrate interpersonal skills required to communicate effectively about solutions to complex problems; and
8. display behavior consistent with the ethical and legal standards within a field of study.

**Major Topics**

Topics relate to demonstration of specialized theory, practical skills, and ethical and professional behavior within a specific allied health scope of practice.

- I. Complex procedures that follow guidelines within the scope of practice
- II. Technical skills that require specialized equipment
- III. Artifacts and anomalies that may occur within patient testing scenarios
- IV. Discretion scenarios to assess or to not assess patient tests
- V. Patient communication

The Common Course Outline (CCO) determines the essential nature of each course.  
For more information, see your professor's syllabus.

VI. Ethical issues and code of ethics for a specific field of study

**Course Requirements**

Successful completion of a national certification in one of the accepted allied health care fields is required.

**Other Course Information**

This course is a placeholder to award a predetermined number of credits for prior learning by articulated industry credit. Students must complete at least 25% of the Allied Health Management program of study in residency by taking CCBC coursework.
